Treatment Timeline

Day 1 – Arrival & Medical Evaluation

Arrival in India followed by consultation with the surgeon and basic diagnostic tests to confirm the condition and suitability for stapled haemorrhoidectomy.

Day 2 – Surgery

The patient is admitted and undergoes stapled haemorrhoidectomy under anesthesia. The procedure removes or repositions hemorrhoidal tissue using a special stapling device.

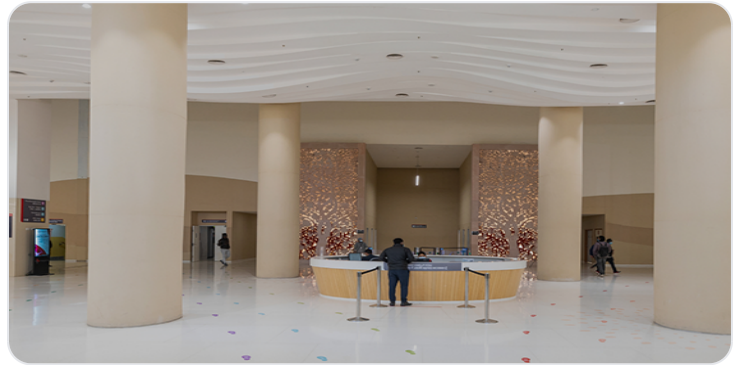

Day 3 – Recovery & Discharge

The patient is monitored for recovery, receives medications and dietary guidance, and is discharged once stable.

Day 4-5 – Follow-up Consultation

Follow-up visit with the surgeon to assess healing and recovery progress before traveling back home.

Frequently Asked Questions

Who needs stapled haemorrhoidectomy?

Patients with severe or prolapsed hemorrhoids that do not improve with medication or non-surgical treatments.

Is stapled haemorrhoidectomy painful?

It generally causes less pain compared to traditional hemorrhoid surgery.

When can I return to normal activities?

Light activities can usually be resumed within a few days after surgery.

Can hemorrhoids return after surgery?

Recurrence is possible but uncommon if proper lifestyle and dietary habits are followed.
